

GRAPES: 100% Glera.

**VINEYARD AREA:** The Glera grapes, which are indigenous to the **Veneto region** of North East Italy, are grown on gentle hillside slopes. Training is the Cordon system and the vines are planted using the high density method, **with four to five thousand vines per hectare**.

**HARVEST:** The decision on when to pick the grapes is critical – the grapes must be **fully mature**, but still retain the **vital high acidity needed** to make Prosecco. The harvest takes place in the second half of September.

**VINIFICATION:** After picking the grapes are **de-stemmed and very gently pressed** in a pneumatic press, followed by chilling and a natural sedimentation to separate the wine from the solids. Selected yeasts are added to initiate the primary fermentation.

**PRIMARY FERMENTATION:** Fermentation takes place in **stainless steel tanks** in temperature controlled conditions not exceeding **18°C.** Fermentation is off the skins and lasts for approximately **8-10 days**. As soon as the fermentation is finished the wine is racked. The wine is then cooled, there is no malolactic fermentation in order to retain as much freshness as possible.

**SECONDARY FERMENTATION:** We use the **Charmat method** for making Prosecco Spumante. The secondary fermentation is carried out in **150hl cuvée close tanks**. Selected yeasts are added and fermentation is very slow - at a temperature of around 14°C and at a pressure of around 3 bars. The wine is continuously rotated in order to give it maximum contact with the lees, resulting in a **well-rounded**, **full-flavoured wine**. The wine is then cooled and filtered prior to bottling.

**TASTING NOTES:** Prosecco Spumante has fine bubbles, with a classic fresh, aromatic nose. The wine is very soft on the palate, offering **refreshing acidity with lots fruit flavours** such as apple and apricot, with some citrus notes. Serve chilled as an **aperitif**, or perfect with **vegetable** or **fish based oriental dishes.**
